

ASUSPRO A4110 All-in-One PC

FLEXIBLE 15.6-INCH ALL-IN-ONE PC FOR EDUCATION, POS SOLUTIONS, KIOSK AND OTHER APPLICATIONS

Designed to meet the needs of applications such as point-of-sale

(POS), self-service machines, educational or digital signage, the A4110 is an All-in-One PC with a 15.6-inch capacitive 10-point multi-touch display with anti-glare solution. It is powered by a next-generation Intel Celeron® processor for smooth multitasking performance. A4110 also features an optional NFC module and a

fan-less design for quiet and stable operation. Its slim and stylish space-saving design, with VESA-mount-compatible chassis and an attractively slim 1.3cm bezel, make it ideal for public-facing use or where space is at a premium.

Designed to do more

Intuitive 10-point touch controls with NFC module

ASUS A4110 features a 15.6-inch 16:9 LED-backlit display with anti-glare solution that ensures crystal-clear images and reduced power consumption. The 10-point touch panel offers a responsive and smooth touch experience. A4110 is designed for convenient connectivity, and is equipped with serial (COM) ports, USB 3.0 ports, a VGA port and a HDMI output, so it can connect easily to other commercial devices — from projectors at school to barcode readers and POS systems at retail. The fan-less design reduces operation noise and improves reliability by reducing dust in the system. Additionally, an optional NFC (Near Field Communication) module can be installed for even more flexibility, allowing customers to develop their own applications based around A4110, such as retail POS solutions.

Simplified Management and Security

Total Protection for Physical Assets and Virtual Data

ASUS A4110 All-in-One PC features ASUS Business Manager — a set of tools that simplifies routine PC maintenance and optimization tasks. This software package features an intuitive single-page interface where users can access system monitoring tools, BIOS updates, USB Lock for controlling data movement, as well as energy-saving controllers and more. For physical asset protection, A4110 offers a Kensington lock slot to help keep your data safe and secure.

Proven reliability

Built for the real world

All ASUSPRO PCs are subjected to a series of rigorous tests, including noise, vibration, drop and thermal-shock tests, to ensure they meet our exacting standards and exceed those used by other manufacturers. So you can rest assured that your new computer will work in harsh environments — from dry and icy to hot and humid — as well as surviving the regular bumps and knocks of shipping.

Efficient Energy Saving

Preserve the environment while Lowering Operating Cost

The energy-efficient ASUS All-in-One PCs protect the environment while helping lower businesses' operating costs. With its mercury-free and super-bright 15.6" LED

backlit panel and a package with 80% recycled material, the A4110 AiO PC consumes less energy and can be easily recycled, saving money and reduce ultimate emissions footprint. These eco-friendly workstations are recipients of some of the industry's highest environmental certifications including ENERGY STAR and EPEAT® Gold.

SPECIFICATIONS

Model Name	A4110
Operating System	Option for Windows 10 Pro
Display	15.6" (39.6cm), 16:9, Wide Screen, 1366 x 768, LED-backlight
Touch Screen	Multi-touch: 10-points touch
